

Nets of 3D Objects

May-06-19 8:34 AM

- A Net is a flattened 2-D representation of a 3-D object.
- What would the net of a soup can look like?

- Some objects can have more than one net:

- others possible too.
- A rotation doesn't create a different net.

- What would this shape look like as a 3-D object?
